

Activities Calendar Kennissalliantie July-September 2010

Meetings, activities and events

The Kennissalliantie organizes many of its activities in collaboration with its partners.

- **Program**
The programs of the activities can be found on our website: www.kennisalliantie.nl
- **Subscribe**
www.kennisalliantie.nl
- **Enrollment**
The registration period varies by activity. Call or email with Kennissalliantie because some activities have a maximum number of participants.

Each month, the Kennissalliantie organizes inspiring meetings where knowledge, trends, innovation and networks are central.

Through interactive workshops, business cases, events and company visits you can get in touch with the latest developments in your own and other interesting fields.

This calendar gives an overview of activities of three months and is updated monthly.

Recipes for improvement and innovation
Combining different ideas and points of view create recipes for improvement and innovation.

Co-creation and the four factors
Because the most talked-about innovations are mostly co-creations, the Kennissalliantie brings the groups together (business, education, research and government).

We facilitate dialogue between entrepreneurs and students/scientists from research and public education to explore ideas. Where relevant, we help the project by getting financial support from the government.

More information is available on our Web [Calendar](#). Sign in and get inspired. Participation is usually free.
